About me.

My name is Budnikova Elizaveta. I'm 14. I study in school # 30 in the 8th grade. I live in Chita.

I'd like to tell you about one of the most beautiful places in our region lake Arahley.

In Zabaykalsky Krai there are a lot of amazing places that are not only attractive due to their beauty, but they are also quite suitable for tourism.

Lake Arahley is a unique natural landmark in Zabaikalsky Krai. It is called “the Pearl of Zabaikalie”. Lake Arahley attracts fishermen at any time of the year, because it is rich in golden and silver carp, pike, sazan and perch. And, of course, birds such as seagulls come to build nests here.

As for me I and my class go to Arahley every year. We play in volleyball and walk in the fresh air

Here you can swim and get chocolate tan like in the Black Sea in summer and gather mushrooms and berries in the woods in autumn.

Lake Arahley is available to all comers. On its coasts there are several tourist bases where guests can live under comfortable conditions and feel themselves like home.

In addition to unequal beauty, the lake has healing properties. Fresh air, useful substances contained in water and clay improve skin condition, raise vitality tone.

In quiet weather from the boat bottom is seen on pretty decent depth. The water in the lake is so clear that you can see how fish swims among the stones.

In general Zabaykalsky Krai is a picturesque place of the land with pristine nature and ancient places quite untouched by civilization.
