Hello! My name is Sasha Reutova. I'm 16 and the pupil of the 10th form. I live in the Far East in Khabarovsk Krai Ulchsky Raion in a small village Kiselevka. Our Ulchsky Raion is called "The country of lakes and rivers or Ulchia" by its people who live on the both banks of the Amur River. River-going Meteors are the most common means of transport in the raion.

In 1896- 1897 Kazak Evgraph Evgraphovich Kiselev with his family was overwhelmed by the mountains with birches, oaks, Amur grapes, Schisandra chinensis was settled here. In 1890 Governor- General Grodecov named our village Kiselevka in honor of the most respectable man of the settlement the manager of the lime's plant- Ivan Evgraphovich Kiselev.

Kiselevka is the dearest place for me because it's my birthplace. If you visit us you will be delighted at taiga, the cleanest air, beautiful lake Cheremshannoe, berry bushes: raspberry, red bear berry Amur grapes, Schisandra chinensis, Rhododendron.

Amur River, lakes are generous to us. People catch crucian, pike, Kaluga up to 500 kilograms in weight, the Amur sturgeon, salmon species crown the long list of fish found here. You can eat native dish tala, red and black caviar.

Our village is multinational. People preserve national traditions with great care. The ancient spirit of Ulchi lives in the applied arts. There is no a single thing that lacked the elaborate design.

To understand our soul you should attend our Winter Festival. It is the most colorful event which takes part in Kiselevka every year. At the end of the winter all people hurry up to our House of Culture to see dancers, to hear the group of singers "Kazachka", to play games.

I'm proud of my birthplace.
